

RFID Smart Tool Bag

CK-B2

I Introduction

CK-B2 is an RFID smart tool bag that developed based on UHF RFID technology and complies with the ISO 18000-6C protocol. It can help the user to check the inventory in the bag and void safety accidents caused by tool missing .

II Features

1. **User friendly:** The users can place the tools casually without considering their position and can set the default quantity by themselves.

2. **Tools counting:** It will count all the tool inside the bag with the help of RFID. No need the user to check the tools one by one.
3. **Real time alarm:** It will show alarm to the user once there is tool missing.
4. **Bluetooth:** The user can connect it with Bluetooth and do the settings.

III Technical Specification

Main Specifications	
Model	CA-B2
Physical Specifications	
Dimension	420mm(L*)220mm(W)*350mm(H)
Material	composite
Screen	0.96" OLED
Capacity	50pcs
Communication	Bluetooth
Reading Speed	3s
UHF RFID	
Alarm	Buzzer
Charging method	Type-C
Battery capacity	10000mAH
